Dignified Burial for Disaster Events

INDIANAPOLIS, April 15, 2009/PRESS RELEASE/- In a disaster event, when the number of fatalities is greater than what local officials can manage, the Everybody Coffin™ offers an alternative dignified burial solution. The crucial last step to mass fatality planning is burial, and in a mass fatality situation, the number of caskets available are in short supply. A mass fatality plan must address traditional bereavement customs, the need for family closure, and the dignity associated with burial. The Everybody Coffin provides a traditional, inexpensive way to bury the deceased.

The Everybody Coffin is a quality product, at an affordable price, that requires minimal storage space. At \$200, the Everybody Coffin is a functional, affordable way to provide dignified burial during disaster recovery. The Everybody Coffin is available in two sizes (large and small) and is designed to fit 95% of the United States population. The Everybody Coffin stores flat, is easily assembled without the use of any tools, and ships in water resistant packaging for secure, long-term storage.

DQE is dedicated to helping you plan for mass fatality events with our line of mass fatality planning products that includes post mortem kits, body bags, shroud kits, and the Everybody Coffin.
