Introducing the MOD - A New Addition to MasCache™ Surge Care Products

INDIANAPOLIS – JULY 2, 2009/PRESS RELEASE/– When a large-scale health emergency occurs, healthcare organizations need products on hand to rapidly increase surge capacity to meet increased demand for medical care. MasCache™ medical surge care products are disposable supplies selected based on recommendations by various government agencies and the expert research of DQE, Inc. to meet the standard of care for 25 patients for 96 hours.

Now, DQE offers two products groupings for its MasCache line - the MOD and POD. Each MOD and POD contain configurations of prepackaged patient care kits, linen kits, staff scrubs and lab coats. Additional items such as privacy curtains, IV poles, disposable stethoscopes and more are also included.

MasCache™ 48 Hour MOD

A MOD is a mobile disposable storage cabinet filled with essential supplies. Each cabinet can be easily rolled and positioned as needed in a central location within a surge care setup. Two storage cabinets contain enough supplies for 25 patients for 48 hours of care and are contained on only two pallets.

MasCache™ 96 Hour POD

A POD is a grouping of MasCache surge care products that are designed to be stationed and dispensed at bedside. A POD is designed to create organized treatment areas so that temporary patient care areas can be rapidly deployed.

Using a POD, MOD, or a combination of the two, DQE can prepare hospitals and shelters for large-scale health emergency or disaster events. Visit www.dqeready.com/mascache for additional information.

About DQE
