The DQE® Prism Identification Band Additional Functionality for the DQE® Prism Inflatable Light

INDIANAPOLIS - DQE, Inc. has added increased functionality to the DQE Prism Inflatable Light, new in 2009. For years, the DQE Prism Inflatable Light has been providing 360° of light for emergency scenes. With the addition of the new **DQE Prism Identification Band**, the light can now also serve as area signage.

The DQE Prism Identification Band fits snugly around the DQE Prism Inflatable Light to provide illuminated signage on two sides of the light. Each identification band is custom-made with the lettering and letter colors specified by the buyer. Common band lettering includes "COMMAND" and "TRIAGE," lighting and identifying specific areas of an operation.

The DQE Prism Inflatable Light is an air-inflated cylinder that raises the light source 15 feet to provide complete scene illumination. The light is compact and lightweight for transport and set up by one person. The DQE Prism Inflatable Light illuminates completely in less than three minutes, to light up to 12,000 square yards, or approximately two football fields. The light is also available as a Mini Tower, inflating 9 feet high for indoor or low overhang areas.

DQE, Inc. manufactures and distributes emergency preparedness and response equipment for first responder, hospital, and industrial emergency response use. Headquartered in Indianapolis, Indiana, DQE proudly celebrates 19 years of service. For additional information and to learn more about DQE and its family of products, visit www.dqeready.com.
