

Ready now for what's next.™

Featuring the Virtually Indestructible, Indestructo™ Decon Shower

INDIANAPOLIS, April 15, 2009/PRESS RELEASE/- When emergency decontamination conditions call for equipment that will withstand more than your standard wear and tear, make sure your decontamination shower is as ready as you are, with the Indestructo Decon Shower. Constructed of ABS thermoplastic, the Indestructo is highly resilient, and designed to hold up to the most rugged emergency responder conditions.

The Indestructo is constructed of the lightest and strongest break-resistant pipes and fittings on the market, with specially designed showerheads to maximize durability. The shower assembles quickly using quick-connecting locks, and has a fully collapsible design to allow for quick storage in an easy-to-carry vinyl bag. The four showerheads have a total output of 12gpm for full, complete water coverage. Two windscreens reduce overspray. The shower can be set up in under 3 minutes to ensure a quick response time.

The Indestructo Shower System includes:

- One Indestructo Decon Shower
- Handheld Sprayer with 8 Ft Hose
- Collection Pool
- Elevation Grid
- Two Wind Screens
- Black Vinyl Carry Bag
- Mesh Bag to hold Wind Screens

The Indestructo is part of a broad DQE® line of decontamination shower systems. These showers are designed by hazmat team experts for durability, quick set up, and ease of use.

About DQE

DQE, Inc. designs and sells essential products that emergency responders depend on to enhance their jobs while saving lives. Headquartered in Indianapolis, Indiana, DQE proudly celebrates 19 years of service. For additional information and to learn more about DQE and its family of products, visit www.dqeready.com.
